## Key Features:

### INNOVATIVE HOT PAPER CUP - FROM NATURAL TO NATURAL

Bagasse PLA coated paper cups and bagasse paper lids made from a renewable natural plant fiber pulp originated from reed, bamboo, sugarcane and wheat straw.

Our paper cups that are made from natural resourced materials which provide a more environmentally conscious alternative to traditional disposable packaging used by the coffee industry in the UK. The PLA coating makes this paper cup 100% biodegradable, compostable and recyclable.

The innovatively coated PLA paper cups provide heat resistance for beverages up to 100 degrees Celsius.

### NEW BAGASSE PAPER LIDS - FROM NATURAL TO NATURAL

The new hot cup lids are also made from a renewable sugarcane pulp known as bagasse. It is 100% biodegradable, compostable and recyclable, decomposing in just about 88 days and more to that it is healthy, nontoxic and resist to high temperatures.

### PULP LIDS vs PLASTIC PS / PP LIDS

Material	Temperature Resistance	Cost	Biodegradable Time	Harmful Gases Emission
PS	≤65°C	Low	Not biodegradable	Some cancer causing substances like phenyl ethylene PAH, BPA, etc.
PP	100-120°C	High		
Pulp	135°C	Medium	120-180 days	No harmful gases

## NO MORE PLASTIC CUPS & LIDS IN THE UK REDUCE WASTE, REUSE, RECYCLE
